

CDC 202

Figure Drawing 1:

Drawing from a live model, quick sketch with long pose.

Course description:

Students work from a live model in the methods of charcoal medium introduced in the first quarter. The class will stress accurate measuring, simplification, and basic figure drawing. As simplification of the figure provides the groundwork for a successful drawing, students will begin with many quick, but accurate sketches, while working their way up to long, delicately rendered figure drawings towards the end of the course.
