For this, you will need the white, the black, and a burnt umber of any brand. To this we could add a slight bit more color... bring any red, yellow, and blue with the former three and we will find our way.*

Paints

Please use your discretion when buying paints. You may already own colors that are similar to mine or of different brands. I understand the price of paint and can work with you. Contact me with your palette questions at rosefrantzen@aim.com .

Canvas

I understand that some folks tape or staple their canvases to a board. This is okay for the head study but not recommended for a longer pose. I will be using double primed linen stretched. If the attendee has a favorite working surface other than these, they should use it. I am aware some people like to work small, and, if this is set in stone, you can do so, though I really wish for people to try something around life-size. It may be prudent to bring a third or fourth canvas/panel.

Oil Sticks

I may use oil sticks during my demo, if you have some you can bring them, however oil sticks are not a necessary supply.
